

Cultural heritage object		
DigiCult Data Model (DCDM)	Europeana Data Model (EDM)	Note:
Object Description Fields	Class edm:ProvidedCHO	Cultural Heritage Object (CHO)
Name	dc:title	<i>A name given to the CHO</i>
Inventory number	dc:identifier	<i>An identifier of the original CHO</i>
Description	dc:description	<i>A description of the CHO</i>
Genre	dc:type	<i>The nature or genre of the CHO. Ideally the term(s) will be taken from a controlled vocabulary.</i>
Date of creation	dcterms:created	<i>The date of creation of the CHO. Europeana recommends date conforming to ISO 8601.</i>
Time period	dcterms:temporal	<i>Temporal characteristics of the CHO. i.e. what the CHO is about or depicts in terms of time (e.g. a period, date literal 0....n 22/55 or date range.)</i>
Language	dc:language	<i>The language of text CHOs and also for other types of CHO if there is a language aspect. Mandatory for TEXT objects, strongly recommended for other object types with a language element. Best practice is to use ISO 639 two--- or three---letter primary language tags<sup>5</sup>. Repeat for multiple languages. We also recommend the use of the ISO 639---2 code for no linguistic content (ZXX).</i>
Type	edm:type	<i>The value must be one of the types accepted by Europeana as it will support portal functionality: TEXT, VIDEO, SOUND, IMAGE, 3D.</i>
Duration/Size	dcterms:extent	<i>The size or duration of the CHO.</i>
Synonym	dcterms:alternative	<i>Any alternative title of the CHO including abbreviations or translations that may not be exact.</i>
Material	dcterms:medium	<i>The material or physical carrier</i>
LOCATION of the object Country Region Province Municipality Cultural area/ Area of distribution Location	dcterms:spatial	<i>Spatial characteristics of the CHO. i.e. what the CHO represents or depicts in terms of space (e.g. a location, co---ordinate or place). Use format: Country Region Province Municipality Cultural area/ Area of distribution Location</i>
KEYWORDS	dc:subject	<i>Keywords</i>

Digital presentation of ICH object		
DigiCult Data Model (DCDM)	Class edm:WebResource	
Digitized by	dc:creator	<i>the creator of digital resource- Person, organisation ...</i>
Format	dc:format	<i>format of this digital representation</i>
Copyright owner	dc:rights	<i>Copyright © - only name</i>
Date of digitization	dcterms:created	<i>Date of creation</i>
Digital size	dcterms:extent	<i>The size or duration of the digital resource - minutes, bytes, ...</i>
Copyright Description		
Data Management	+ edm:rights	<i>The value in this element will indicate the copyright, usage and access rights</i>
Description files		<i>Other files with annotation and/or description of the object i.e. MPEG 7 annotation, DC annotation and etc.</i>

Complex object or Collection(intangible object)		
DigiCult Data Model (DCDM)	Collection Class (sub---class of edm:ProvidedCHO)	Note
Property	Property	Proposed Definition
Name	dc:title	Name of collection
Synonym	dcterms:alternative	Alternative name of collection
Identifier	dc:identifier	Unique key for collection
Creator/observer	dc:creator	Entity that gathers objects together following implicit or explicit criteria or accrual policy
Copyright	dc:rights	Information about rights held in and over the collection which cannot be captured by the edm:rights property.
	dcterms:extent	The number of objects within the collection
Description	dcterms:description	A summary of the content and topics of the collection.
Key objects	edm:highlight	A 'key object' from the collection be it a masterpiece, or a good exemplar. (This is a sub-property of the inverse of the <i>isGatheredInto</i> collection membership property)
IsPart	dcterms:isPartOf	Any other collection(s) that contain the current collection
HasPart	dcterms:hasPart	Any other collection(s) contained within the current collection
Type	cld:itemType	Type or nature of objects or resources in the collection e.g. audio recordings
Genre	edm:itemGenre	Genre of objects or resources in the collection e.g. classical music
Format	cld:itemFormat	The format (media type, physical or digital) of the objects in the original collection. This may be information about a physical thing (for physical objects) or a digital media type (for born-digital objects). This property refers to the ProvidedCHO, not a web representation
Language	dc:language	If text, the language(s) in the collection
Keywords	dc:subject	Terms that describe the overall topical content of the objects in the collection.
LOCATION of the object Country Region Province Municipality Cultural area/ Area of distribution Location	dcterms:spatial	A place(s) or area(s) associated with most or all of the objects in the collection.
Time period	dcterms:temporal	A time period(s) associated with most or all of the objects in the collection.
